“This legislation represents a meaningful, bipartisan commitment to the public safety professionals who put their lives on the line for our communities — including EMS professionals whose service is often invisible until crisis strikes. By establishing clear timelines, strengthening oversight, and ensuring interim financial support, this bill brings long-needed fairness and predictability to the PSOB program for injured responders and surviving families,” **said Chief and CEO Jonathan D. Smith of the Pittsford Volunteer Ambulance, Inc.** *“These expanded disability provisions recognize the realities faced by permanently injured EMS and fire professionals who can no longer serve, while expediting benefits for 9/11 responders and improving survivor protections. Together, these reforms strengthen trust, improve accountability, ensure the PSOB program works as intended, and reaffirm our national commitment to care for and support our public safety professionals and their families.”*

“Members of the Syracuse Fire Department, along with firefighters, police officers, and emergency responders across this nation, put their lives on the line every day in service to our community and our country. They and their families deserve a system that delivers timely benefit determinations, protects surviving beneficiaries from unfair tax burdens, and ensures that permanently disabled public safety officers are not excluded from the support they have earned. This legislation honors their sacrifice and reinforces our commitment to stand behind those who serve. I thank Senator Gillibrand for her leadership and advocacy in advancing this critical effort.”

These measures introduce accountability and predictability into a process that has too often been marked by prolonged delays. Of particular importance to our community is the extension of partial PSOB eligibility to officers who are permanently, but not totally, disabled and unable to perform any gainful work as public safety officers. These individuals have sacrificed their health in the line of duty and should not be excluded from support because of technical distinctions that do not reflect the reality of their injuries.”*
